BS 9999 is designed as a co-ordinated package covering the four main areas that influence fire safety measures, namely fire safety management, the provisions of means of escape, the structural protection of escape facilities and the structural stability of the building in the event of a fire, and the provision of access and facilities for fire-fighting.

[BS 9999 Handbook - Effective Fire Safety in the Design ...](#)

The concept behind the development of BS 9999 and BS 7974 is that technical guidance on fire safety is provided at three different levels. This permits a design approach to be adopted that corresponds to the complexity of the building and to the degree of flexibility required. The three levels are as follows:
