*A new SMA actuator design for a prosthetic hand was introduced by Chee Siong et al. , where two SMA actuators are used to actuate the robotic finger, instead of using the conventional push–pull type and the biased spring type (see Fig. 16). The two actuators are inserted from both ends of the outer stainless tube, which functions as a heat ...*

*Open-source hardware (OSH) consists of physical artifacts of technology designed and offered by the open-design movement. Both free and open-source software (FOSS) and open-source hardware are created by this open-source culture movement and apply a like concept to a variety of components. It is sometimes, thus, referred to as FOSH (free and open-source hardware).*
