The Mitsubishi Pajero with the 4G54 engine was released during 1982 to 1991. Available in a short and long wheel base model, this was an excellent four wheel drive vehicle. Not too heavy compared to other larger brands, it could tow quite easily for medium loads and was still small enough to drive around local streets with ease.

...

The Mitsubishi 4G54B ranks as the number one worst engine to tune. Although it was the first Japanese production car engine with computer-controlled fuel injection and turbocharging, it left much to be desired. As one of the largest four cylinder engines of all time, this iron block, 8- or 12-valve, single cam engine suffered from a number of issues.
