1. Introduction. Cupping therapy is an ancient method of treatment that has been used in the treatment of a broad range of conditions. 1 There are many types of cupping therapy; however, dry and wet cupping are the two main types. 2 Dry cupping pulls the skin into the cup without scarifications, while in wet cupping the skin is lacerated so that blood is drawn into the cup. 3 Although cupping ...

D.H. Zald, in Brain Mapping, 2015. Abstract. Located in the midbrain, the substantia nigra (SN) can be divided into the pars compacta, which is the primary source of dopamine (DA) projections to the striatum, and the pars reticulata, which represents a key output zone, the basal ganglia. The SN can be visualized in detail with specific MRI sequences and, with PET, radioligands targeting ...
